

Why I love my School

Sarahi

I love my school because I love learning it's fun and makes you smart. Not only that, but it's a place to have the capability to become who you want to be. Meaning that you can turn what you thought was impossible into the possible. New Horizon Charter Academy is a school with students smart and prepared to go through anything the world might throw against us. Where we unite into one as a team. That is what I like about my school. All students are kind though some just try to give you a bad day. Though instead of doing the same you can be thanking them because that's what makes you become stronger. Even though some of us don't consider ourselves one of the smartest it doesn't mean you aren't talented. Many of us have a huge talent that can be probably from drawing the best drawing yet or having the best singing voice. That even includes the people who can play an amazing instemaunt. Though our school is also filled with sport fans. Many of them love playing kickball, softball, football, soccer, basketball, or even handball. New Horizon Charter Academy also has many people who love gymnastics. There is also the ones who are who they want to be and let's nobody put them down. Everybody in New Horizon Charter Academy make this school the way it is. So it's all for one and one for all. We make the school the way we want it to be because we make the change.

I also love my school because it has so many programs the can help you. For example we have websites such as ISIP, Illuminate, Revolution k12, Pearsonrealize, and so many more that help you improve. Something else I love about this school is that so many people help around class. That way if someone needs help in class and the TA is helping you can ask someone else for

help. Even though this school isn't the way you would expect a middle school to look it has the same expectations. New Horizon has grown a lot. Not only because we have two campuses, but because comparing our grades from before we can all see how we all grew expanded our knowledge and improved over the time. That is what I love about our school. New Horizon is a great school and I believe it will continue to grow on and expand.

I love my school because

By: Mary C

The reason why I love New Horizons Charter Academy because it is filled with friendly staff members and students. There are lots of caring teachers and teacher assistants to support and help us. You can always count on them for advice and guidance. Attending at New Horizons Charter Academy shows us to be kind to one another and to have a growth mindset with each other. This school helps us socialize and make friends with children and adults of all ages.

Another reason why I love New Horizons Charter Academy is because it is a judge free zone. Nobody is judging your every move because we are all unique. They accept you for who you are inside and we treat each other like family. That is why I like this school because we get to know one another and by the end of the year we are a big family. Most of us have known each other for years. We each get to share our interesting journeys and trips we have made during vacation with each other.

My final reason why I love New Horizon Charter Academy is because they make learning fun. For example they show us videos and hand on activities in class. We also get to do art and play instruments. Then there is so much space for us to run and play until our legs get tired. In this school we have lots of fun learning activities to participate in. There is S.T.E.M, art and P.E so we always have some entertaining activities to do that way we are never bored. This is why I love New Horizons Charter Academy.

I ❤️ my school because...

I love my school because of everything in it. My school is the best. The teachers give students the work and encouragement they need to succeed. And the students have a fantastic principal. Though we have to give the TA's a round of applause because they take up their time to help the wonderful teachers of taking care of the children, and those lunch ladies are spot on with those lunches. They know how to fill you right up when you are starving after 2-3 hours of work in class. Though what I especially like about this school is all the friends you make. I recommend everyone to put their child in this school.
